Value Beyond Expectations

Roll-Formed

Roll-formed Selective Pallet Rack is the most flexible and extensively used pallet rack in the material handling industry. At Hannibal, we offer a wide variety of styles, sizes and gauges to meet most capacity and seismic requirements.

- Roll-formed pallet rack is a cost effective solution to your storage needs
- Columns and beams are manufactured from Grade 55 hot rolled steel
- Quick and easy-to-install with no special tools required
- High quality powder coat finish

Structural

Our S Series Structural Pallet Rack is manufactured from heavy-duty structural steel to withstand the most rigorous of applications. The S Series is available in various sizes and capacities to meet the most stringent requirements.

- Delivers high impact and debris resistant design that is ideal for food handling environments.
- Heavy-duty bolted connections
- Low maintenance
- High quality powder coat finish

Mix & Match

We combine the strength and durability of structural frames along with the cost effective versatility of roll-formed beams to form the Hannibal Hybrid Systems that provide:

- Severe impact resistance
- Bolted connection security
- Efficient weight-to-capability savings
- High quality powder coat finish

Systems

Drive-In:

Hannibal's Drive-In Rack Systems allow a significant increase in pallet storage density.

- Requires fewer aisles
- Space saver arm design allows for the maximum storage levels
- Available in both roll-formed or structural columns
- Heavy-duty saddle connection offers a solid stable loading environment
- Various structural rail options are available to meet the heaviest load requirements
- High quality powder coat finish

Push-Back:

Push-Back Rack Systems offer the optimal combination of selectivity and storage density by placing pallets in lanes that are 2 to 5 pallets deep, thereby reducing the pick time in applications that require a large number of pick faces.

- Available in both roll-formed or structural columns
- High quality powder coat finish

Pick Modules:

- Available in both roll-formed or structural columns
- High quality powder coat finish

Cantilever

Hannibal Material Handling's Cantilever Racks are ideal for storage of long, bulky products such as carpet rolls, lumber, pipe, tubing and other similar products. Our cantilever racks are available in a heavy-duty structural or medium duty roll-formed design. Either system will make storage and organization of irregularly shaped products easy and cost effective.

Structural Cantilever:

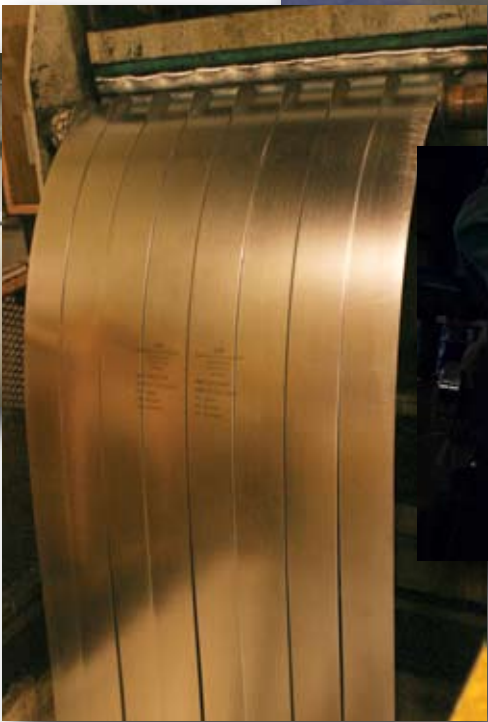

- Strong, Safe, and Economical
- Perfect fit for a fast paced, large fork truck environment
- Adjustable upright center and arm length provides for a wide range of long and short products to be stored in same bays
- Wide variety of options available
- High quality powder coat finish

About Us

Since its inception in 1997, Hannibal Material Handling has grown to become the largest manufacturer of steel pallet rack west of the Mississippi. The breadth of our product line has enabled us to provide complete storage solutions to some of the largest big box retailers, distribution centers, archive storage and cold storage facilities in North America. We attribute our success to listening to our customers' needs and then striving to expand and improve our value added services as well as broadening our already extensive product offering.

Hannibal Material Handling is a division of Hannibal Industries, a wholly owned subsidiary of Mitsui Steel Development Inc. Our corporate office and manufacturing

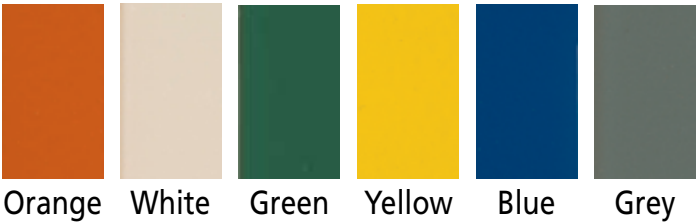

facilities are located on a 22.5 acre site in the Los Angeles area. We also maintain a regional warehouse facility in Stockton, California.

At Hannibal all rack systems are manufactured to exceed the stringent requirements of the Rack Manufacturers Institute (RMI). We also hold a City of Los Angeles Fabricators License, one of the most severe manufacturing certifications in the U.S. All company welders are certified by the American Welding Society through an accredited AWS testing facility, and we offer the finest powder coat paint finish available in the industry.
